SUMMARY

Software engineer with 2 years of experience in React, Next.js, Node.js and MySQL. I work across the stack, from building UIs and REST APIs to deploying on AWS with Docker and Redis. I like owning features end to end and shipping them to production. Looking for a software engineer or full-stack developer role.

SKILLS

- **Frontend:** React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Bootstrap.
- **Backend**: Node.js, Express.js, REST APIs, WebSockets, Laravel.
- **Database**: MySQL, MongoDB, Redis, PostgreSQL
- **Cloud & DevOps**: Docker, Linux, AWS (EC2, S3, RDS, Lambda, CloudFront, EBS, SNS, IAM, Elastic Beanstalk)
- **Tools:** Git, GitHub, FFmpeg.
- **Other Languages:** PHP, Python, SQL.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer | MindCode Lab Pvt. Ltd. Feb 2025 - present

React.js, Next.js, Node.js, MongoDB, MySQL, AWS (EC2, S3, RDS, IAM)

KIKA: Quick Commerce Platform

- Built the Next.js user app, React.js admin panel and Node.js backend, and deployed it on AWS EC2.
- Added real-time order tracking over WebSockets, streaming delivery partner location and order status to users.
- Built the delivery module: OTP verification, order accept/cancel, and delivery partner and salary management.
- Built admin panel and tools for store, warehouse, stock and order management**.**

Sports ERP: Multi-Branch Enterprise Resource Planning System

- Built core modules for 10+ swimming pool branches handling 500+ daily requests: POS billing, membership and role-based access control.
- Integrated a hardware-level smart-gate system for real-time entry validation across all branches.
- Integrated the Meta API for automated alerts and entry confirmations

Smart Admin: Internal Management System

- Built role-based access system — admin, HR, and employee panels.
- Modules: attendance, daily tasks, project tracking, salary & payments.

ReachUp: Corporate Website

- Built a full-stack Next.js website with service pages and enquiry forms.
- Implemented server-side rendering for fast page loads and better performance.

Extra Group: Multi-Sector Group Website

- Built full-stack Next.js and Node.js website for a multi-sector spanning healthcare, energy, and infrastructure.
- Delivered SSR-based architecture with dynamic content sections across group subsidiaries.

OPEN SOURCE

VesselSSH: Browser-Based Server Management & Development Environment **[** GitHub]

Tech Stack: Next.js, TypeScript, Node.js, Express.js, SQLite, Linux

- VesselSSH is an open-source DevOps tool designed to provide a desktop-like experience directly in your browser to access and manage your servers.
- . Built core services for **background jobs, process management, permissions, and security checks**, and integrated system apps like **Terminal, VS Code (code-server), and File Manager**.
- Currently developing a Process Manager to monitor and manage running Linux processes, similar to Windows Task Manager.
- Gained hands-on experience in Low-Level Design (LLD), system design, worker processes, child processes, and Linux process management.

PROJECTS

GameScreen: Gaming Wallpaper Platform **[** Link] [GitHub]

Tech Stack: Laravel, React.js, Python, Redis, Docker, AWS S3, FFmpeg, MySQL

- Built a multi-user wallpaper platform with uploads, likes, comments and downloads up to 4K resolution.
- Designed an **asynchronous processing pipeline** using Laravel queues, Redis and a Python service for heavy media processing.
- Automated generation of **multiple resolutions and thumbnails** using FFmpeg and stored media assets on **Amazon S3**.
- Containerized services using **Docker** and deployed on **Render**; processed media across 3 resolutions (480p, 1080p, 4K) with automated FFmpeg pipelines, reducing manual processing to zero. Rendered animated parallax wallpaper by using MoviePy.
